

SUMMER Research in Geosciences

Lamont-Doherty Earth Observatory
COLUMBIA UNIVERSITY | EARTH INSTITUTE

The Lamont-Doherty Earth Observatory of Columbia University and the National Science Foundation (NSF) Ocean Sciences are seeking outstanding rising sophomore and junior undergraduates to participate in its Summer Intern Program for Undergraduates (REU) program. The REU program provides research opportunities in earth, ocean, atmospheric and environmental science to undergraduate students who are United States citizens or permanent residents and are currently enrolled in a degree-granting program.

We Provide:

- \$5000 dollar stipend
- Free Columbia Housing
- Travel Expenses (restrictions apply)
- Lab/research experience

Seminars on:

- Earth, ocean, atmospheric and environmental science
- Professional Development
- Graduate School
- Ethics in Research

For additional information about the research performed and application forms, please visit <http://www.ldeo.columbia.edu/education/programs/summer-internship>
