

We are looking for graduates who have obtained degrees in Geology, Petroleum Engineering, Petrochemical and/or Petrophysics to work as mud loggers. Qualified candidates will train at our facility just outside of Austin, Texas. Upon completion of training, the trainee will prepare to begin work as part of a two man team. Typically a mudlogger will make an average of \$50,000 a year.

Candidates must have:

- Structural geology and/or Stratigraphy
- Strong computer skills
- Good grammar and spelling

Many geologists who work for the operators began their careers as mud loggers. Developing this type of experience helps to expand your field work and provides you with experience that is hard to gain elsewhere. Geotech currently has many projects in process in Central and South Texas.

If Interested, Please submit your resume to [Headquarters@geotechloggingservices.com](mailto:Headquarters@geotechloggingservices.com)
