

CCGS 2014 Short Course #2: Basic Well Log Analysis

DATE: November 20, 2014

Time: 8-4:30

Location: Downtown Corpus Christi in EOG Resources Conference Room

Address: 539 North Carancahua, Suite 805 Corpus Christi, TX 78478

Cost: \$100 for CCGS Member, \$75 for students, \$125 for non-member

Instructor: Tom Fett

Tom Fett has been a member of the CCGS since the 1970's. He graduated from Trinity University in 1966 with a BS in Engineering Science and worked 32 years for Schlumberger Wireline, including 15 years in Corpus. He has taught numerous courses in Log Analysis and Dipmeter and Imaging Interpretation, including at the senior and graduate levels at Texas A&I (now TAMU – Kingsville) for 10 years. He is currently a geological consultant working from Medina Lake (30 miles west of San Antonio).

Log Analysis Course Description: The course will focus on the following topics:

- What is a "log" and how to read it
- Vintage logs (ES and Microlog)
- "Quick look" Interpretation Techniques
- Interpretation of Triple Combo Logs

Additional modules are available depending on group preferences.

- Review of available Advanced Logs
- Complex Lithology (Carbonates) Interpretation
- Unconventional Reservoirs, including the Eagle Ford Shale, Austin Chalk, and Buda Lime.
- Basics of Dipmeter and Imaging (as FMS & FMI) Interpretation
