

SUMMER/2018 Costa Rica Research Experience for Undergraduates (REU)

PROGRAM GOALS

- **10-week** international experience for undergraduate students within a **montane forest in Costa Rica**;
- Improve skills in **critical thinking, problem solving, communication and collaboration** through participation in basic and applied **field-based research**;
- Increase **awareness of the interconnection** between forests, water, and people and the impacts of forest and water management;
- Provide students with a **cultural experience** that compliments and further develops their research by allowing students to “Enter the Community”.

WHO SHOULD APPLY?

- Undergraduate students with demonstrated interest in **hydrology, ecology or climatology**;
- Major in earth or environmental sciences, engineering or other related fields;
- US citizenship or permanent residency required;
- Expect to graduate no earlier than December 2018

**Applications are
NOW OPEN!**
